## The World's Leading Expert On Locking Hubs

We appreciate the opportunity to help you. Many consider us the best in the world at what we do and we love what we do. We can get to the solution, that's a promise.

Here is some information on our **4x4 Locking Hubs**:

- We borrowed Ford's proven design that has been used on all Super Duty's since 1987 with millions on the road, obviously a battle proven design.
- We improved the design significantly using only Timken Hub Bearings that are 100 % ABS system compatible.
- Hub Bearings, Stub Shaft Bearings, and Locker Mechanism are greaseable **on the vehicle**.
- **Locker Bearings**, **Locker Units**, and **Stub Shaft Bearings** are off the shelf replaceable items.
- Our kits use **one-piece** slide on technology, the simplest design possible.
- Convert from 4-wheel drive to true 2-wheel drive, completely disengaging the **entire** front axle, drive train, and transfer case, everything stops rotating. **No wear**.
- We stand alone, have no competition, and are considered the best that there is. Join us and change automotive history and change **your truck**.

Installing our TRM hubs is **simple**! The hardest part of the install is typically removing your old splined hub.

- The **first** video shows how simple the install really is: [https://www.youtube.com/watch?v=39\\_yr\\_KGrU](https://www.youtube.com/watch?v=39_yr_KGrU)
- This **second** video was taken by a customer that also discusses how easy it was for him to install his TRM hubs: <https://www.youtube.com/watch?v=8yBNpBiJolo>

Also, we have an awesome program that you can take part in to earn quick cash to help cover the cost of your TRM Manual Locking Hubs:

- **The Ram Man Refer-A-Friend Program**: After you purchase your hubs, if you refer friends, family, or work buddies to us and they purchase a set of TRM hubs we will give **you \$100**. Give people your name and phone number. When they call us we will use that to call you and let you know they purchased a set of hubs. We will collect your address and send you **\$100 cash**. For more information on the program please see the flyer attached to this email.
- **The Ram Man Video Program**: You can take a short video, even one minute is fine. Discuss your install, your results and overall impression. Send it to us, and we will send **you \$100**. For more information on the program please see the flyer attached to this email.

These programs are simple and easy! It's stupid to drive around with essentially full time 4-wheel drive wasting money and our planet's resources. TRM locking hubs are smart and as green as green can be. The single biggest thing that can be done to save fossil fuels and lessen your carbon footprint.

**Make sure you check out our Customer Testimonials and our Happy Customer Pictures that are also attached to this email!** If you have any other questions, please don't hesitate to give us a call!
